Eco-Friendly Product Offerings

The following products are currently offered by Primescape, and boast significant environmental benefits that fall in line with today's eco-conscious initiatives.

Lechuza

Category: Container (Plastic)

Primary Use: Decorative; Custom sub-irrigation available

Green Benefit:

- Container is 100% recyclable
- Overspill of plastic during manufacturing is re-used
- Sub-Irrigation option conserves water significantly

Other Notes: Available in over 40 colors and 5 different models

Riverside

Category: Container (Plastic)

Primary Use: Decorative

Green Benefit: Container is 100% recyclable

Other Notes: Available in over 40 colors and 15 different models
Best for exterior use

PrimeMetal

Category: Container (Metal)

Primary Use: Decorative

Green Benefit: Made from 90% recycled materials

Other Notes: Available in 12 colors and 10 different models

PrimeMetal Deluxe

Category: Container (Metal)

Primary Use: Decorative

Green Benefit: Made from 100% recycled materials; 100% recyclable

Other Notes: Available in over 40 colors and 4 different models

MORE 

Mona

- Category:** Sub-Irrigation Units; tanks and links (Plastic)
- Primary Use:** Sub-surface water reservoirs hydrate plants from below
- Green Benefit:**
- Made from recycled materials
 - Requires less watering visits by techs, especially on large planter beds; conserves water and fuel
- Other Notes:** Primescape is the exclusive North American distributor of all MONA products

Planter Technology

- Category:** Sub-Irrigation Units; self-irrigating liners and containers
- Primary Use:** Dual-walled containers hold water for automatic hydration
- Green Benefit:** Requires less watering visits by techs, especially on large planter beds; conserves water and fuel
- Other Notes:** Planter Technology offers custom and modular irrigation options, both for indoor and outdoor use; wide selection of models available

PrimeMix Soil

- Category:** Installation Materials (Organic)
- Primary Use:** Interior/exterior soil; sub-irrigation soil
- Green Benefit:**
- Lasts 3x longer than peat/bark/wood-based soil
 - Better water retention
 - Contains coconut coir and rice hulls, both of which are by-products of other refining processes
 - None of PrimeMix's components adds to (or takes away from) the environment it is helping to create, unlike peat and wood
 - Also contains haydite, which uses nutrients more efficiently
- Other Notes:** Sold in 2-cubic or 60-cubic foot bag

Poly Pebbles

- Category:** Installation Materials (Synthetic Top-Dressing)
- Primary Use:** Alternative to moss as a top-dressing for plants
- Green Benefit:**
- Made from 75-90% recycled plastic soda bottles
 - Weighs a fraction of river rock (shipping/fuel savings)
 - Long-lasting; does not promote fungus or mildew growth and can be reused without excessive cleaning
- Other Notes:** Available in 4 colors

Eco-Spacers

Category: Installation Materials (Synthetic Top-Dressing Shelf)

Primary Use: Adhesive-backed “shelf” to hold moss/pebbles at container surface

Green Benefit: Made from bio-based soybean oils, not petroleum

Other Notes: Available in 2 sizes

AquaFur

Category: Sub-Irrigation (Wicking)

Primary Use: Hydration of plants from below (under rootball)

Green Benefit:

- Made from 100% synthetic material (soda bottles)
- Does not promote growth of mold or fungi
- Longer lasting - works consistently for over 12 months (ten times longer than its leading competitor’s brand)
- Cuts down on water usage/frequency

Other Notes: No wetting agent needed

EcoEXEMPT IC²

Category: Insecticide (Natural Ingredients)

Primary Use: Pest control in plants

Green Benefit:

- Made from natural oils (peppermint, rosemary, and more)
- No EPA registration necessary
- Active ingredients are included on the EPA’s minimum-risk pesticides list exempted under FIFRA Section 25(b).

Other Notes: Strong odor with initial application
